

# Water irrigation calculator

**Dr. S.Raman, a water management scientist and consultant to IWMI-TATA Water Policy Programme, has developed a water irrigation calculator. It will be introduced on a pilot basis in the Krishna basin study site in Kharif season 2010.**

---

The irrigation water calculator is a microprocessor based platform for calculation of water requirements of different types of crops, grown in different climatic conditions. The irrigation water calculator is designed to enable farmers to assess the requirement of water for crops, based on the location, crop geometry and the stage of crop growth.

The instrument is developed by Dr. S.Raman, a water management scientist and consultant to IWMI-TATA Water Policy Programme.
