

# Climate resilience of farm enterprises with mountain summer farming

- **Background/framework:**  
International research project "Mitigation and Adaptation in Cultural Heritage Landscapes: Lessons from Transhumant Pastoral Systems for Managing Novel Climate Risks"  
(<https://prosjektbanken.forskningsradet.no/project/FORISS/352110>)
- **Objective:**  
**Assess the adaptability of farm enterprises practicing mountain summer farming in Valdres, to climate change**
- **Method:**  
**20-30 structured interviews with mountain summer farmers, using FAO's "SHARP+" tool (<https://www.fao.org/in-action/sharp/en/>)**
- **Language:** Interviews in Norwegian, thesis preferably in English
- **Collaboration partner / external supervisor:** NIBIO - Norwegian Institute of Bioeconomy
